1. It is necessary to consider new **Objectives**? If you think so, include the corresponding templates.

Yes, I think we need a new objective since this is not related to the payment management, the room reservation, the neighbourhood community management, the user management or the request management

OBJ - 1	Contracts Management
Version	1.0.A
Authors	Javier García
Sources	Jack
Description	Our system should be able to have the possibility to register new contracts for the maintenance.
Subgoals	Being able to check the state of some contracts with externals.
Importance	High-level
Urgency	High
State	Beta version
Stability	High-level
Comments	-

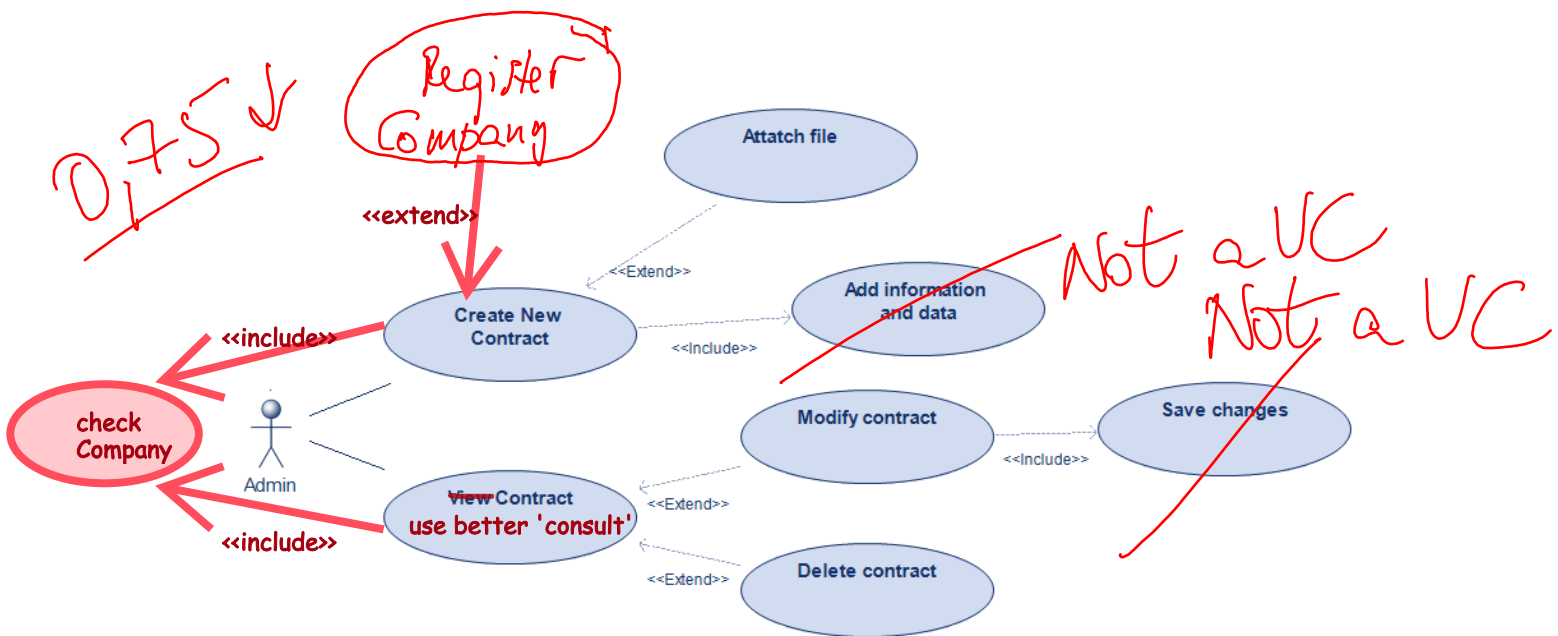

2. Is it necessary to consider new **Information Requirement**? If you think so, include the corresponding templates.

IR - 1	Contracts
Version	1.0.A
Authors	Javier García
Sources	Jack
Related Goals	-- OBJ-1
Related Requirements	-- ?
Description	The system should store the information corresponding to the contracts that have been already done, storing the information and the state of those contracts and the relative companies in order to be used in future actions.
Specific Data	<div> <div> -Company name -Fiscal address -Contact person -Contact email -Contact phone </div> <div>IR-2 Company 0 of 1</div> </div> <div> -Date (for start and end) -Service provided -Cost of service </div> <div>IR-1 - Contract 0 of 0.4</div>
Time Frame	Past, present and future
Importance	High-level
Urgency	High-level
State	Done
Stability	Medium level
Comments	—

3. Is it necessary to consider new Functional Requirements? If you think so, include the corresponding Use Case Diagram and the specification of the FR "Create New Contract"

FR	Create New Contract
Version	1.0.A
Authors	Javier García
Sources	Jack
Related Goals	--
Related Requirements	--
Description	The system should allow admins to create new contracts with different companies.
Precondition	-The contract must be required by an administrator
Normal Scenario	<ol style="list-style-type: none"> 1. The administrator choose to create a new contract. 2. A new contract is getting done. 3. Some information gets required to the admin. 4. Everything is introduced successfully. 5. A new option displays, asking the creator to attach a file. 6. The attach file gets uploaded. 7. The system displays a resume of the new contract.
Postcondition	If the action is successful a new contract may have been created.
Alternative Scenario	<ol style="list-style-type: none"> 4. If some of the information has not being provided as required, the contract doesn't get done. 5. If the administrator doesn't attach a file, the resume of the contact displays automatically. 7. If the system doesn't display the resume, an error has occurred and the process must get done again.
Performance	High
Expected Frequency	High
Importance	Very important
Urgency	Very urgent
State	Early stages of development
Stability	High level
Comments	--

Not like this

4. Can you identify new **Non-Functional Requirements**? If so, include the corresponding templates.
